

Our approach is to just accept what they pay and give them the same services as everybody else. If you reduce or eliminate services the only one you hurt will be yourselves. There is no way of changing the school policy. Changing the level of service will not influence them to pay more or change policy. It's not a perfect world, be practical.

Who did you speak with there? Was it Joyce?

So LAUSD does have a policy and usually pays the equivalent to close to 50% of the assessment depending on the type of facility. They do it with all BIDs.

Sometimes BIDs take the discount out in their management plan, but most don't and lausd will then pay half the assessment.

I need to check your plan to see what we did exactly.

Hi Laurie,

Checked your management plan this morning and it looks like we gave LAUSD a discounted rate already.

What we did is remove the marketing budget from their assessment rate giving them a lower rate.

You may try asking for the full assessment amount based on this.

Thanks,

Aaron
